## DENTAL PERFECTION

### Repair teeth

#### Fillings

Silver fillings (contains mercury)

from  
**£73.50**

Small

from  
**£165.00**

Medium

**£195.00**

Large

**£245.00**

Size of filling required will be decided by the dentist, this will be shown to you using a intra oral camera located in each surgery.

#### Extractions

If your tooth cannot be saved with treatment the dentist may suggest an extraction and then a replacement once the extraction area has fully healed.

from  
**£150.00**

Private dental extractions start from £120.00 depending on which tooth needs to be extracted, the dentist will advise and provide you with an estimate if the charge is any different.

It is important to consider if the tooth is removed what impact this can have on your smile's ability to eat and effect the remaining teeth.

If you are considering a tooth removal please look at our replace

## DENTAL PERFECTION

### Replacing teeth

#### Dental crowns

When a tooth is broken down and a filling won't help to strengthen and support it, your dentist will offer a dental crown.

Silver/chrome - NHS standard

White/porcelain, this is colour matched to look and feel like a tooth

Gold - a robust and hard material

EMAX crown

from

**£306.80**

**£799.00**

**£949.00**

**gold cost**

+

**£799.00**

#### Dentures

There are two types of dentures available and the dentist will advise which would be best to suit each different patient's situation.

Acrylic

Chrome

**Price to be  
confirmed at  
Consultation**

#### Whitening

Home whitening treatment is available at Dental Perfection. The kit includes 2 whitening syringes and the trays which will be made in the lab from moulds of your own teeth. This ensures that the trays fit properly to make sure the gel stays in the trays when they are being worn. The whitening treatment takes approx. 10-14 days depending on the shade of your teeth before you start the treatment.

Whitening Consultation

Boutique by night

Boutique B1 guarantee

**FREE**

**£395.00**

**£695.00**

## DENTAL PERFECTION

### Want a straighter smile?

#### Orthodontic Treatment

At Dental Perfection we offer 3 different types of orthodontic treatments

#### Invisalign

Invisalign is a perfect choice for patients that want their ortho treatment to go unnoticed. The braces are made from clear aligners that are worn over the teeth but are not fixed, this means they can be removed for eating, drinking and brushing your teeth. You will be given so many aligners each time you visit the dentist and depending on your wear time (1/2 weeks per aligner) you will be able to swap these at home therefore limiting the number of times you have to come to the dentist for an appointment.

Single arch  
**£2,500.00**

Full  
**£4,500.00**

Severe  
**£5,500.00**

DENTAL PERFECTION

## Replacing Teeth

### Dental Implants

A dental implant is usually manufactured from clinically pure titanium which is threaded into the jawbone. Bridges, individual crowns and loose dentures can be supported by dental implants.

Single tooth from  
**£3,200.00**

Dental implants are a perfect long lasting option for replacing missing teeth and are a really popular alternative to wearing dentures.

### Sedation

Sedation in dentistry is either in the form of a tablet, which can be taken a few hours before a procedure or by administering medicine into a vein in your arm allowing you to feel relaxed and calm whilst having treatment done.

**Price to be  
confirmed at  
Consultation**

The definition of conscious sedation is that you will be able to remain verbal contact at all times with a wide margin of safety in the choice of drugs and techniques used, allowing treatment ranging from a gum treatment through to advanced dentistry needing to be carried out.

One of the main benefits of using sedation in dentistry is that it allows and amnesic effect. This means that it will eradicate and memory regarding your visit and put you in a sleep like state.

It is at times called 'sleep dentistry' and the closest thing we have to general anaesthetic, because most people fall asleep whilst being sedated but you are really conscious as you are capable to respond to verbal commands, feeling really relaxed and comfortable.

DENTAL PERFECTION

### **Dr Viswanathan Pather**

Dr Viswanathan [Vis] Pather Graduated from the University of Western Cape in December 1996. He has worked as a General Dentist in South Africa before moving to England in January 2000. He has since worked in various places such as Skegness, Leister, Nottingham.

In 2015 he started a 2 year modular course on Straight wire Orthodontics which he completed in 2017 July. He has since done numerous cases in this field.

In 2016 Dr Pather completed a 2-year modular course in Advanced Restorative and Aesthetic Dentistry from Smile Concepts /Dominic Hassell Training institute. In 2018 he qualified to carry out Invisalign also completing the Masterclass that year.

In April 2016 He joined Dental Perfection in Littleover. After 6 months he moved to the Branston branch in Burton- on -Trent. Here he has continued to carry out Orthodontics, Restorative and Aesthetic Dentistry , Invisalign as well as General Dentistry. He also has been carrying out NHS orthodontics in Wolverhampton.

DENTAL PERFECTION

## **Mohit Dabb**

Dr. Mohit Dabb (GDC 73445) has dedicated his practice to endodontics and takes referrals from other practitioners.

Mohit qualified from the Birmingham School of Dental Medicine in 1997.

He is a member of the British Society of Endodontics (BES), and holds a position as a key opinion leader for Sybron Endo. He has trained with Endodontic luminaries such as Steven Buchanan and Cliff Ruddle. Mohit is fully conversant with the latest rotary and reciprocating technologies and applies a range of techniques dependent on the clinical situation.

Mohit is dedicated to offering the most up-to-date quality dental care available to all his patients and prides himself on excellent results and patient satisfaction.

DENTAL PERFECTION

### **Dr Harmeet Gill**

Dr Harmeet Gill qualified in Dentistry in 2010 from Birmingham University and has worked at Dental Perfection since 2014.

One of her key skills is that of smile makeovers and cosmetic work using veneers and crowns to improve the appearance of patients teeth. She has completed a year long diploma in cosmetic aesthetic dentistry and is SAAD trained in conscious sedation. She helps patients who are nervous by treating them using sedation so they feel calm and relaxed through out the treatment.

Invisalign is another area she is trained in to help straighten teeth but most of the time she does NHS dentistry and cares for her patients oral health all year round.

Dr Gill is also trained in Botox and dermal fillers and offers these at the clinic.

DENTAL PERFECTION
